

Eclare 2018

Release schedule for version 2018

Builder Incubator has 2 major versions planned for the year of 2018. The releases are defined as 2018a and 2018b. The enhancements are listed in the two following sections.

Eclare Version 2018a

TxMaintenance Scrolling

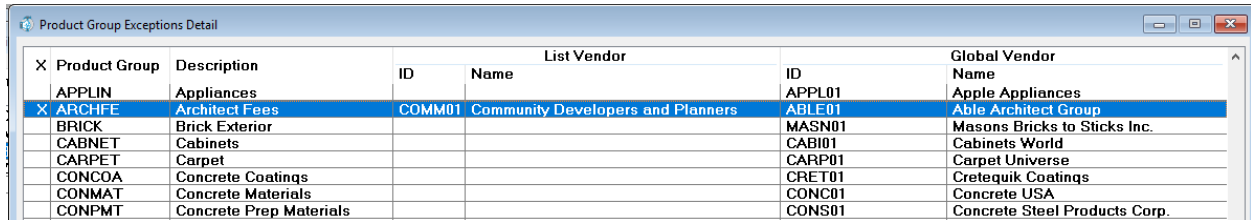

Software Report: 5286-2
 Fixed bug related to the Text Editor scrolling and menu display.

Master File Item Import

Software Report: 5307
 Fixed bug related to the import of Master File Items not updating the item TYPE field.

Master File Item Import

Software Report: 5226
 Expand the Product Group Exception window to show both vendor number and vendor name

X	Product Group	Description	List Vendor		Global Vendor Name
			ID	Name	
	APPLIN	Appliances			APPL01 Apple Appliances
X	ARCHFE	Architect Fees	COMM01	Community Developers and Planners	ABLE01 Able Architect Group
	BRICK	Brick Exterior			MASN01 Masons Bricks to Sticks Inc.
	CABNET	Cabinets			CABI01 Cabinets World
	CARPET	Carpet			CARP01 Carpet Universe
	CONCOA	Concrete Coatings			CRET01 Cretequik Coatings
	CONMAT	Concrete Materials			CONC01 Concrete USA
	CONPMT	Concrete Prep Materials			CONS01 Concrete Steel Products Corp.

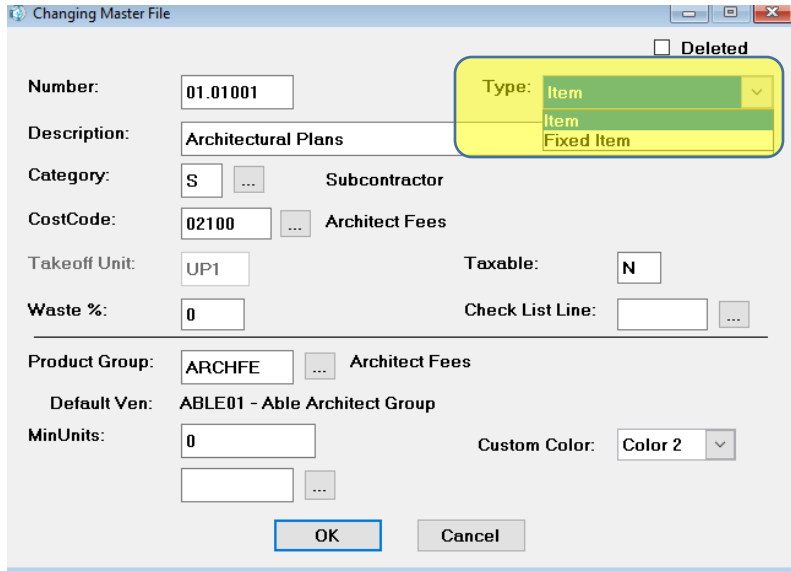

Multiple Monitor

Software Report: 5317
 Changed how window positioning is stored for purposes of multiple monitors. In prior versions, when a user is displaying on multiple monitors, certain windows would become “out of focus” and not displayed. The changes made will position each window with a relative frame and allow better control when moving the application window from monitor 1 to monitor 2.

Master File Item Header Type

Software Report: 5267

Restricted the changing of ITEM types and ASSEMBLY types to HEADER types to preserve database integrity.

Adjust Font Added to Main Menus

Software Report: 5286

This was expanded from the changes we made in version 2017 to include all the MAIN MENU. We also added a BOLD for each font style selection.

Individual users can now select the FONT STYLE and FONT SIZE to meet their individual needs.

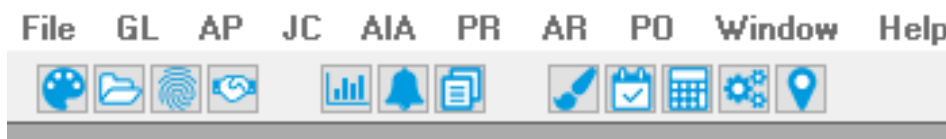

Go to FILE | TERMINAL SETUP | Fonts tab

Select the FONT NAME (Style) and FONT SIZE from the drop-down lists

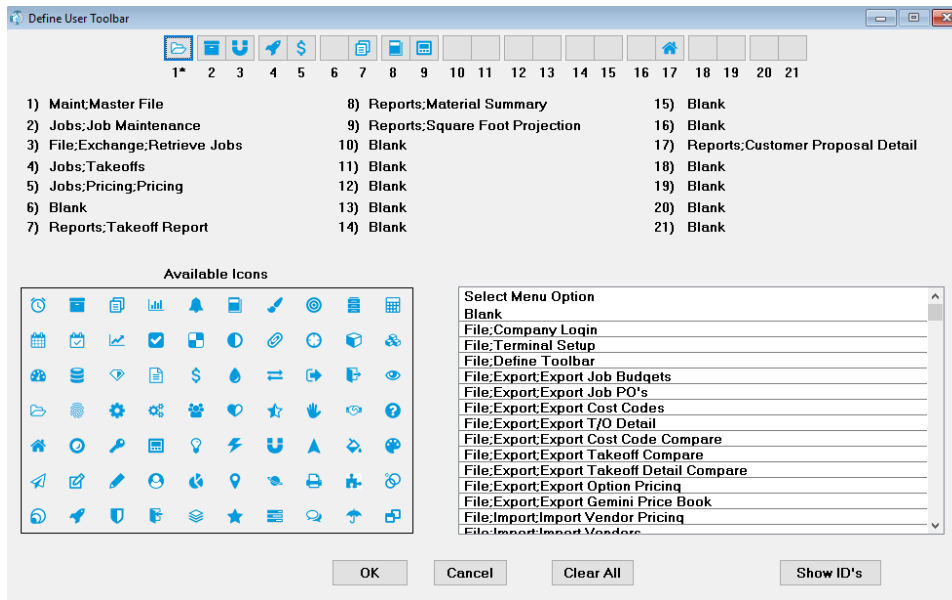

Replaced All Program Icons

Software Report: 5287

Users can assign menu short cuts with the DEFINE USER TOOLBAR. The Icons have been updated to reflect the higher resolution capacity for Windows 10 and future operating systems.

Builder Incubator
 Eclare 2018 What's New

Eclare Version 2018b

These are some of the software enhancements we have planned for the 2018b release. The end-user enhancement requires multiple SR numbers. Therefore, the concepts of the update are summarized.

Modifying the Exchange menu from Eclare to Gemini used to send over budgets and purchase orders. Currently the exchange will update the ORIGINAL budget in Gemini with the total budgeted cost from Eclare (base house and options). The new exchange will send over 3 sets of budgets. The (1) Base House budget, the (2) Base House plus Options and the (3) Purchase Orders. This new method will make it possible to view base house and base plus options side by side in the Gemini Extended Job Report.

Job: A25 - BI Data Test (Lit: B - New Cost Code)

Item #	C Description	Preliminary Budget	Upgrades	Org Budget	Change Orders	Revised Budget	Job-to-Date	Over/Under
00100	Customer Deposit	0	0	0	0	0	12,000-	12,000
00110	Construction Draws	200,000-	50,000-	250,000-	0	250,000-	0	250,000-
Division "00" Totals		200,000-	50,000-	250,000-	0	250,000-	12,000-	238,000-
02100	Architect Fees	300	150	450	0	450	0	450-
02110	Engineering Fees	250	0	250	0	250	0	250-
02130	Portable Toilets	450	0	450	0	450	0	450-
Division "02" Totals		1,000	150	1,150	0	1,150	0	1,150-

Builder Incubator
Eclare 2018 What's New

A major database change is planned for the Eclare Masterfile and Job Takeoff. The goal is to improve the time required to build new models. We have developed two methods, and each will be explained in a summarized fashion below.

Method 1

Add a new Model Field to the Master File ITEM database

Provide a global tool to assign the MODELS to all BID type items for existing plans.

Create a mass ITEM duplicate feature that will allow the user to select ALL bid type items for a specific model and duplicate and assign to a new model.

Vendor pricing details can also be copied across at this stage, similar to how the INSERT/COPY works today.

Add a new Model Field to the Job Takeoff.

When duplicating a job to create a new model, the takeoff can automatically reassign all the individual model bid items as part of the duplication process.

Method 2

Create a new type of ITEM – the FLEX Item

This is an item that will replace the traditional BID type items – where the BID type items are created specifically for each model. The FLEX Item will be created one time (for example Roof Truss-Elevation A) would be created one time for all models.

This method requires the item pricing for the FLEX items to be setup within the job takeoff structure, as opposed to the Master File structure.

Additional price update screens and/import pricing would be created to accommodate price updates across multiple models at one time.

Feb-17-2018

Release: Eclare 2018b

Version: 2018.01.1802.151

Exchange-Eclare to Gemini – Base House

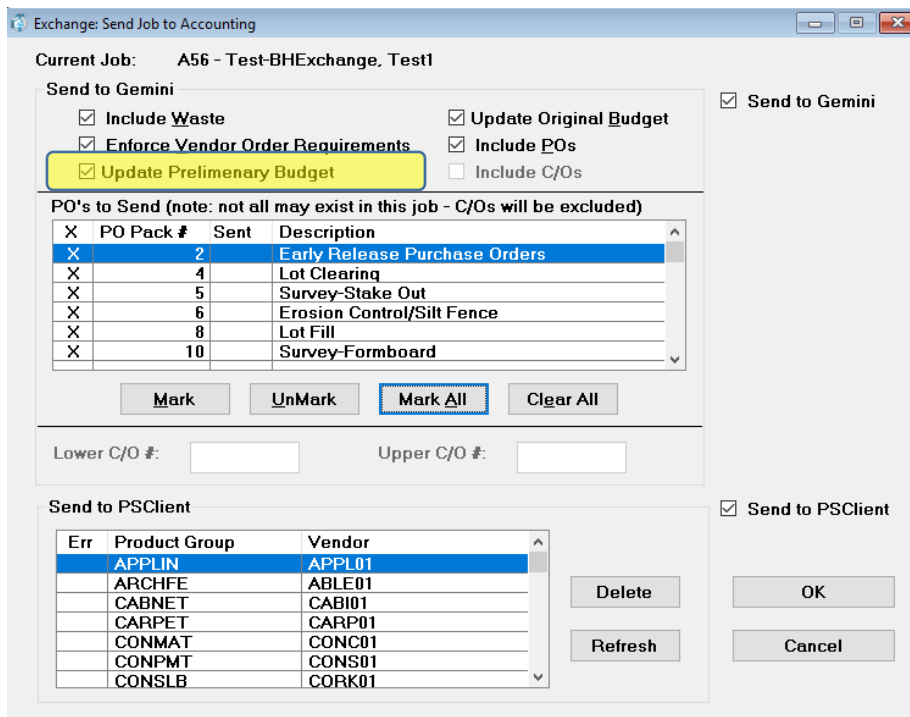

Software Report: SR5081

When reviewing job reports in Gemini, it is helpful to see a column for Base House budget, a column for upgrades (option selections) and a column for the total budget at job start. The Extended Job Report provides these columns, plus the Change Order, Revised Budget and Job Cost-To-Date columns. The Eclare Exchange has a new check box to Update the Gemini Preliminary Budget.

Last page of the Job Take Off report shows Base House and Options

Takeoff Assembly	Description Item No. Description	Status C/C	C/O # RC S Unit	Subdiv Takeoff Qty	Base House Purchase Qty	Elevation Unit Price	Other Extension
Job Summary by Option							
<u>Option</u>					<u>Amount</u>	<u>Quantity</u>	
	Base Unit				175,795.92		
200350	Carpet - Level 3 - Owners Suite				148.20	Various	
200352	Carpet - Level 3 - Bedroom 2				70.20	Various	
200354	Carpet - Level 3 - Bedroom 3				78.00	Various	
202305	Tile - Floor - Level 3 - Kitchen				1,232.00	Various	
Model & Option Totals					177,324.32		

Selecting the UPDATE PRELIMINARY BUDGET will send over the Base House budget separately from the total budget. This will update the PRELIMINARY BUDGET fields in Gemini and the total budget will update the ORIGINAL BUDGET (the budget at job start).

Exchange: Send Job to Accounting

Current Job: A56 - Test-BHExchange, Test1

Send to Gemini

Include Waste Update Original Budget Send to Gemini
 Enforce Vendor Order Requirements Include POs
 Update Preliminary Budget Include C/Os

			175,796	1,528	177,324	0	177,324	0	

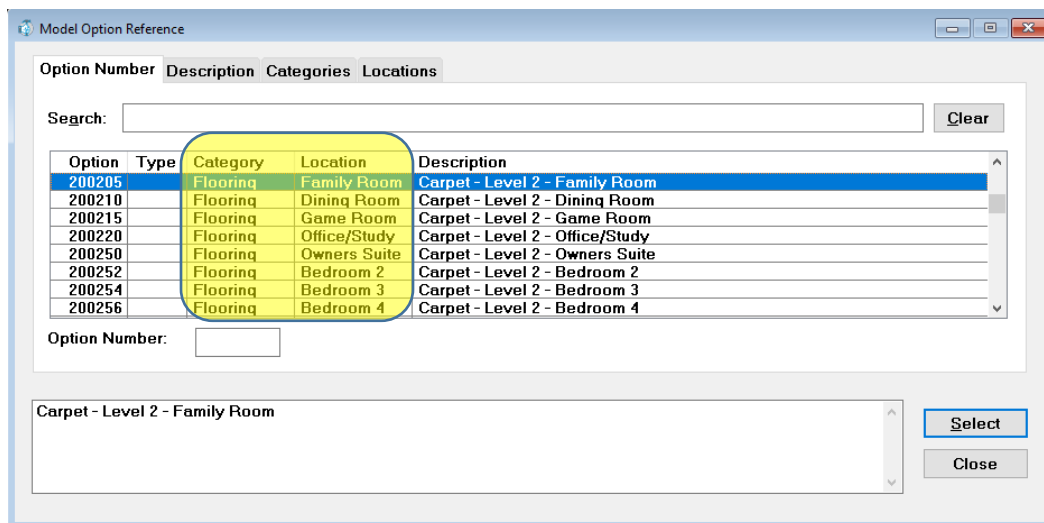

Option Ref Exchange Option Location and Category

Software Report: SR5341-1

Added the Location and Category fields to the Option Reference List

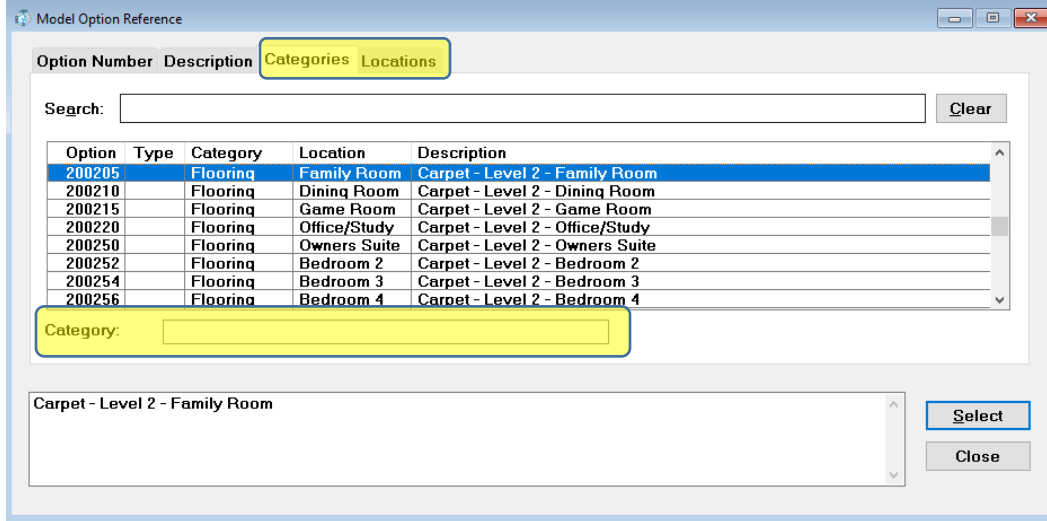

Exchange the PSClient Options (From PSClient to Eclare) and the Locations and Categories will automatically fill in

Option Ref Window-added Lookup-Sorts

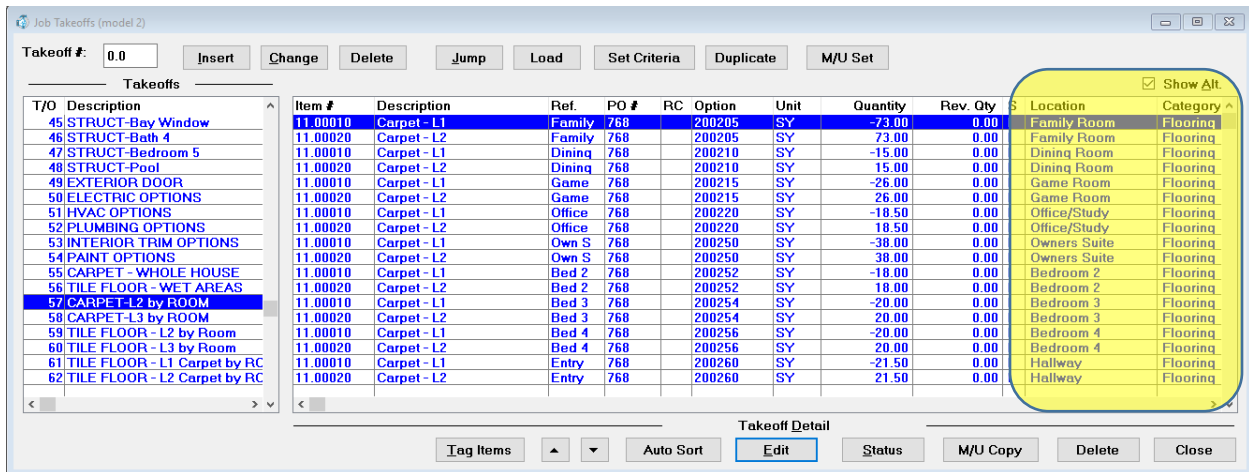

Software Report: SR5341-1

Added a Lookup and Sort for Category and Location

Option Ref Add Location and Category to each takeoff

Software Report: SR5341-2

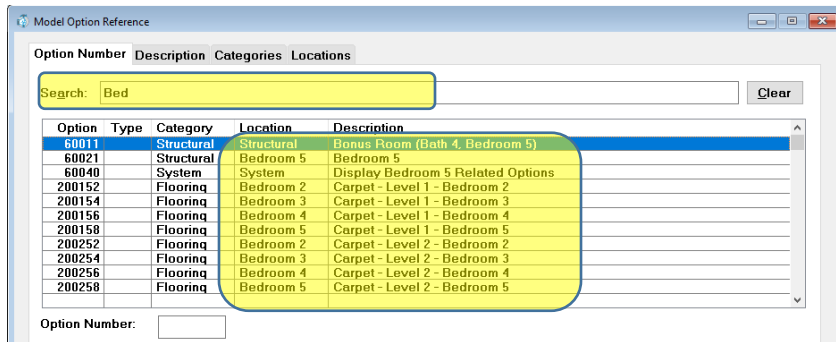

Planned for our next release – the Locations and Categories to be published on the Purchase Orders – at each selected detail line item.

Option Reference-Added SEARCH to lookup window

Software Report: 5352

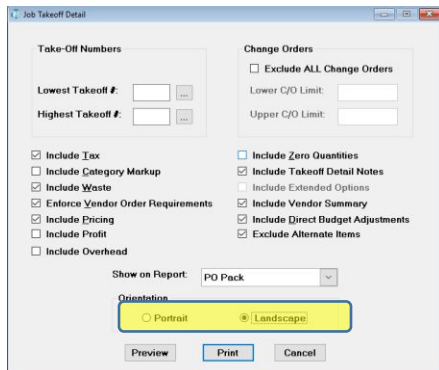

Added the End-string SEARCH so lookups could be done with embedded words and letters, example below shows on descriptions with "Bed" somewhere in the text description field

Job Take-Off Report – Landscape Mode

Software Report:

Landscape provides more room for the entire ITEM description
