

Eclare 2020

 Builder Incubator
Eclare 2020 What's New

Mar-2020

Release: Eclare 2020a

Version: 2020.01.2002.141

Bug Fix - Default Path for Import / Export – Windows File Dialog box

Software Report: ECL-61

Set a default path for each import / export file dialog box.

Bug Fix – User INI file overriding cloudserver ini

Software Report: ECL-63

The individual User ini file was incorrectly overriding the cloudserver ini for the MAILPS Path. This was corrected.

Export of M Type Items

Software Report: ECL-60

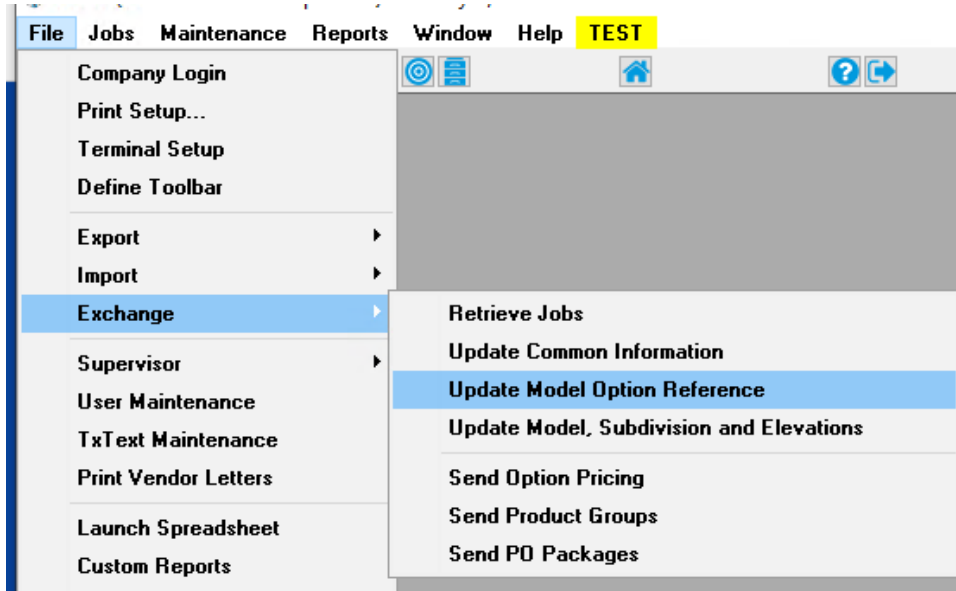

This feature creates an export option for the new M Type master file items, using the same export menu under Supervisor | Global File Maintenance | Master File Export.

The Software Reports listed below were also part of an early release of version 2020. Some builder businesses may already have these features installed prior to this release.

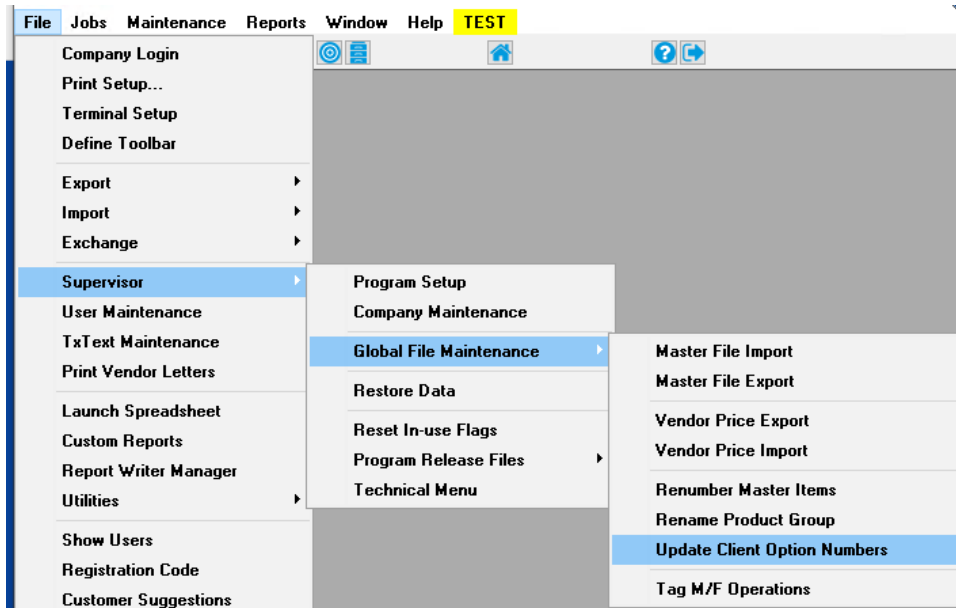

Renumber Option Reference Numbers

Software Report: ECL-59

Added method to allow users to renumber Model Option numbers in PSClient and Exchange / Sync those renumbered options into Eclare – where the old option numbers are tied to specific takeoffs.

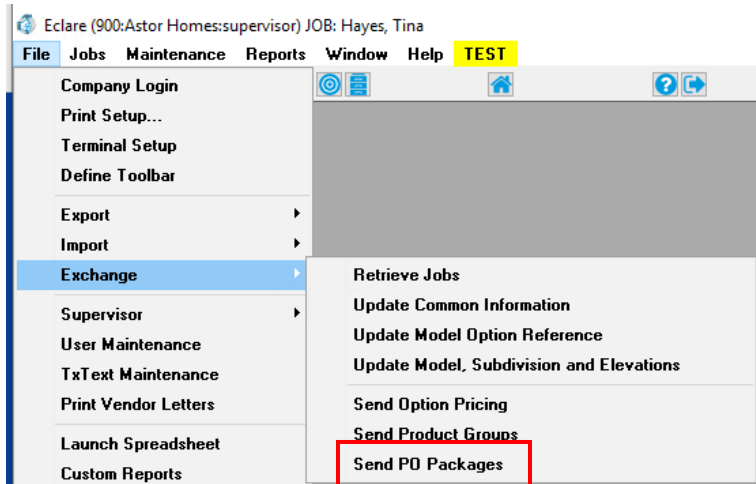

This step will update the Option Numbers at the Takeoff level

Exchange PO Packages to Gemini

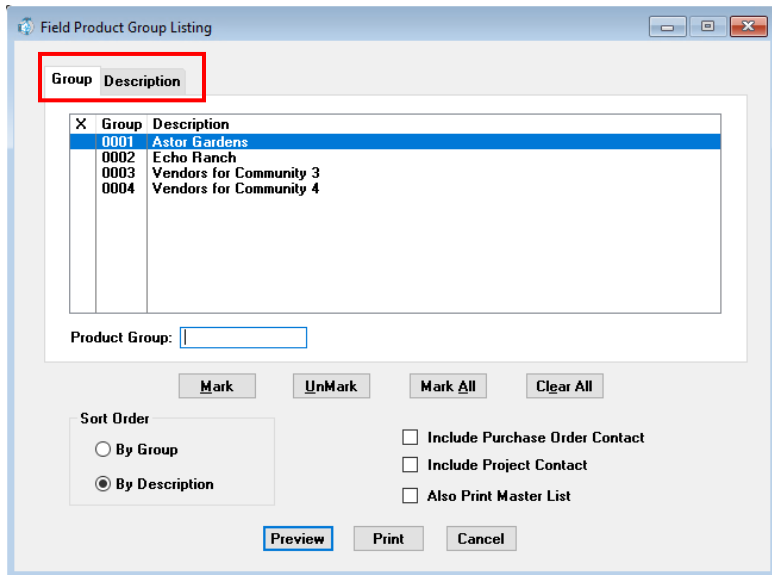

Software Report: ECL-55

Added ability to exchange PO packages from Eclare to Gemini.

Field Product Group – Added Tabs

Software Report: ECL-54

Bug Fix – Pricing Screen and Non- M Types

Software Report: ECL-50

This was a bug related to selecting a Non-M Type Master Item and then being prompted for a MODEL assignment.
