

## **Eclare 2021**

  
**Builder Incubator**  
Eclare 2021 What's New

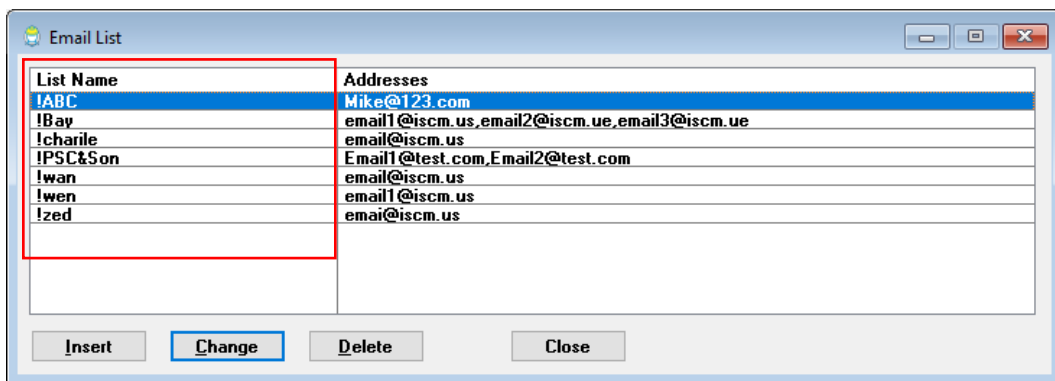

Released Dec-2020  
Release: Eclare 2021a  
Version: 2021.01.2012.011

**MAIL LIST added alpha sort**

Software Report: ECL-85

Added a sort column to the MAILPS – MAIL LIST

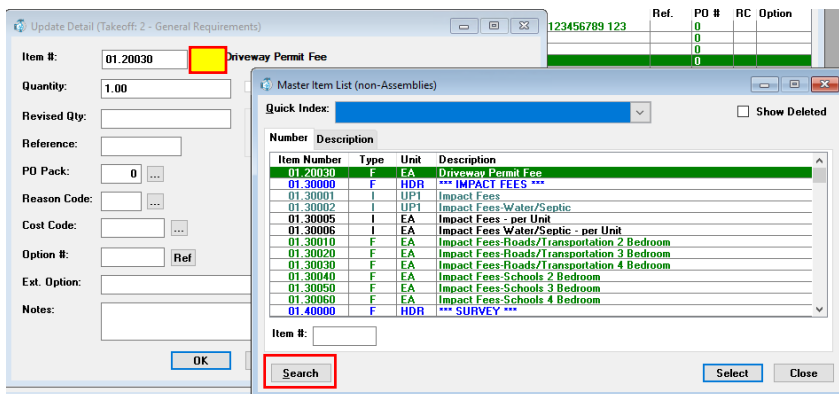

For builders making extensive use of the MAIL LIST having the List Name sorted based on List Name makes locating the correct email group much easier.

**Bug Fix – SEARCH box in Takeoff window**

Software Report: ECL-79

Fixed the SEARCH box when accessed from the job Takeoff window.

**Expanded the column width job price window**

Software Report: ECL-78

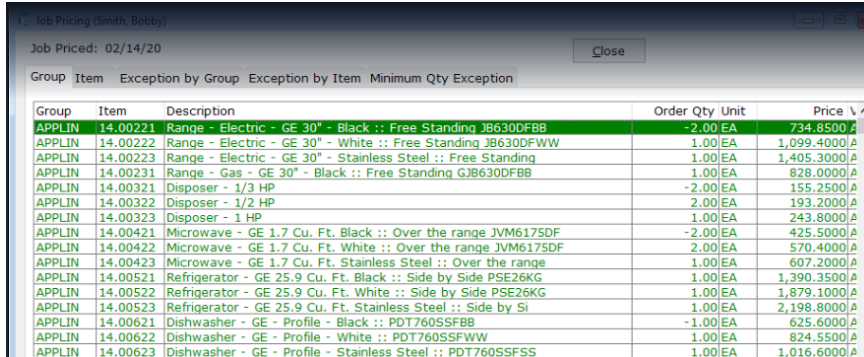

Increased the width of characters presented in the Job Pricing screen to better show the full ITEM description.

**Allow resizing of the Exchange window**

Software Report: ECL-73

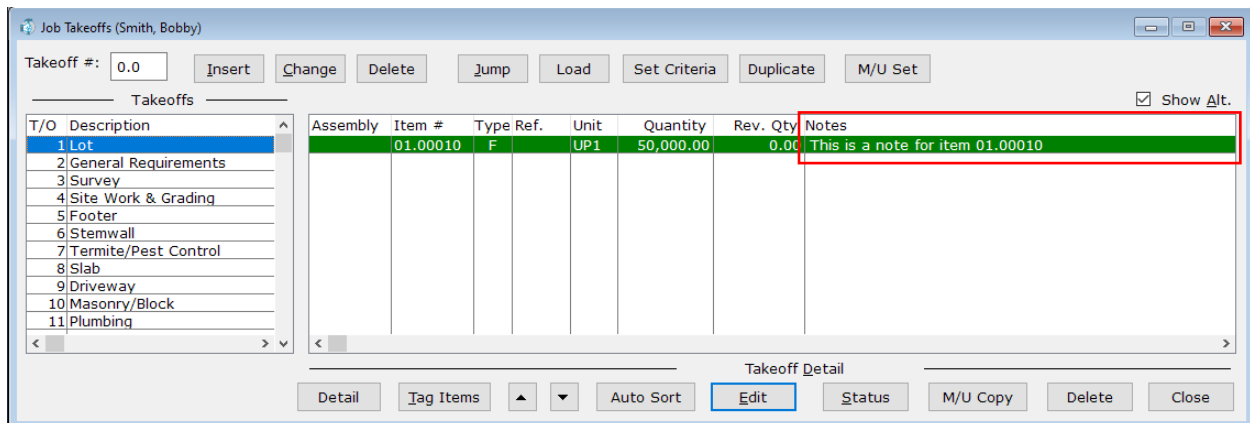

Allow resizing of the Job Exchange window to better display the PO Package section.

**Item NOTES column to be selected to display**

Software Report: ECL-66

The Item NOTES column can now be selected to display in the takeoff window. Notes will appear at the far right and be truncated appropriately based on the column width.

**Navigate to Master File by selecting new DETAIL button**

Software Report: ECL-65

Often a user needs to edit ITEM's in the Master File after viewing the ITEM from the takeoff window. This new feature will allow the user to highlight the ITEM from the Takeoff window, select DETAIL and have the Master File open up sorted to that item.
